LETTER OF RECOMMENDATION

15.04.2026

To Whom It May Concern,

I am writing to strongly recommend **Klymentii Boiko**, who completed an internship at DMA EU as a **Junior Frontend Developer** under my direct supervision from January 15 to April 15, 2026.

During his internship, Klymentii played a key role in building a user-friendly and responsive interface for the MVP of our internal admin panel using **React** and **TypeScript**. He independently and on time delivered the core functionality of the panel, ensured a clean and scalable codebase, and paid great attention to **type safety**. I consistently saw him refactoring his own code to make it more maintainable and clear for the entire team.

From the very beginning, Klymentii demonstrated solid technical skills and an impressive ability to quickly adapt to our tech stack and processes. He didn't just complete tasks – he proactively suggested architectural improvements to components, several of which we immediately implemented in the product. His contributions genuinely helped optimize and accelerate further development of the MVP.

Klymentii always met deadlines, paid close attention to detail, and showed a high level of responsibility. I particularly want to highlight his ability to work effectively both independently and as part of a team, as well as how constructively he receives feedback and immediately applies it in practice.

Klymentii is a proactive, reliable, and highly promising developer who is already ready to take on more complex engineering challenges. I am confident that he will become a valuable member of any team.

Please feel free to contact me if you require any additional information or would like to discuss the details of his work.

Sincerely,
Denis Sardak, senior developer
